

Amendments to the Specification

Please replace the paragraph on page 12, lines 9-15 with the following amended paragraph:

Cryo therapy apparatus 412 is essentially the same in form and function as cryo therapy apparatus 12 but further includes an inner balloon 443 defining an inner cooling chamber 444 and an outer balloon defining 445 an outer cooling chamber 446. A dual-chamber cooling apparatus (such as apparatus 412) may provide additional safety or cooling advantages. For example, outer cooling chamber 446 may prevent loss of coolant into the body if inner cooling chamber 444 failed. It can be appreciated that the dual chamber cooling apparatus 412 can be substituted into any of the other embodiments described herein.
